EXPERIENCE

• Kenneth Tech, Chandigarh Area || Jan' 2023 - Present

- Developed a Secure, Scalable and End-user focused application in the MERN stack to support the Operation of a Crypto exchange platform (A Platform where users can exchange their cryptocurrency)
_Taken part in the act of end-to-end Product development life cycle. (from Ideation -> UI -> Implementation).
- Focused to implemented the Backend REST API.
- Successfully Implemented User Interface using React.js and context API.
- Build the connection between a user account and a crypto wallet.
- **Skills** : MongoDB, Express.js, React.js, Express.js, REST Api.

PROJECT

• Ecommerce Delivery WebApp || April' 2023 - Present

- It's a online delivery webapp. There are two dashboards: one for the admin and another for the user. Admin can create any product that they want to sell and Users can see all the products on the homepage that have been created by the admin. Users can filter the products by using product price and category. After signing up, users can add their favorite products to the cart, choose a payment option, and finally place the order for delivery.
- **Tech Stack** : React.js, Node.js, Express.js, MongoDB, REST API.
- **Link of project** : [Source Code](#)

• Netflix-Clone || Oct - Nov'2022

- This project is a simplified back-end and front-end clone of Netflix. Any user can create an account or log in using their Gmail Id and search for movies, dramas, and web series. All the content is categorized. Users can added movies and dramas to their favorites list.
- **Tech Stack** : React.js, Node.js, Express.js, MongoDB, Rest API, Firebase.
